St. Lukes Hospital  
Jacksonville, Florida 32216

PATIENT NAME: Langford, Dean T

SLH MRN#: 918953                      MAYO MRN:                      SSN: 349321016  
DOB: 06/19/1939                      AGE: 63                      SEX: M  
RM/CLASS: 5FLR^0571^00

DATE OF ADMISSION: 04/01/2003  
DATE OF DISCHARGE: 04/05/2003  
ATTENDING PHYSICIAN: Mark P. Brodersen, M.D.

REASON FOR ADMISSION: Massive osteolysis about the left acetabulum secondary to polyethylene wear from left total hip arthroplasty done long ago.

On the date of admission the patient was brought to the operating room and underwent curetting and bone grafting of the left acetabular region. This surgery was tolerated well with no postoperative problems or complications. He was seen postoperatively by the Anesthesia Department to assist with pain management and by the Physical Therapy Department to begin ambulation and mobilization. This was all tolerated well. Postop hemoglobin 9.9. Patient was discharged to the Brooks Rehabilitation facility. He will continue his rehab at that facility.

Patient is to take a regular diet and to use his TED socks and walker until he returns to see us. He has a followup appointment on 5/12/03.

Postop medications include Lovenox 30 mg subcu. b.i.d. for 10 days and then aspirin daily; one multivitamin a day; calcium 500 mg p.o. b.i.d.; Fosamax 70 mg p.o. q. week; Percocet 5/325, one or two every four hours as needed for
